

NITROGEN 2U® WALL MOUNT GENERATOR

Technical Specifications

NITROGEN 2U® MODELS

Floor Mount **MC-N2U-BC** (w/built-in gas blender)
 MC-N2U-C (nitrogen only)

Wall Mount **MC-N2U-B-CWM** (w/B2U Gas Blender)
 MC-N2U-CWM (nitrogen only)

Compressor Size Jun-Air
 Model No. MC-OF322

Electrical Supply 120 VAC/60hz/Single Phase
 (Dedicated Circuit Recommended)

Fuse Rating 15 AMP

CO2 Gas Input 100 PSI minimum requirement

Nitrogen Generation Up to 32 feet per hour
 Purity meets or exceeds
 craft brewery guidelines

- 4 piece modular component design makes this unit easy to install.
- Similar membrane gas separation technology as the Nitrogen 2U® Floor Mount unit.
- Up to 32 cubic feet per hour of nitrogen gas production.
- Nitrogen purity meets or exceeds craft brewery guidelines.
- With included mounting plate, the Nitrogen 2U® Wall Mount Generator does not take up any premium floor space.
- Enhanced cooling system ensures constant high volume nitrogen production in challenging environments.
- 32"(L) x 29"(H) x 10"(D)

MC-N2U-B-CWM (with B2U Gas Blender)

MC-N2U-CWM (nitrogen only)

B2U Gas Blender

This blending panel utilizes McDantim's Trumix® Double gas mixing technology. The two gas outputs are pre-set for the 25/75% and 60/40% CO₂/Nitrogen draft beer gas blends required by craft brewers and draft houses. (Other CO₂/N₂ blend settings available on request).

The B2U Gas Blender is capable of producing enough mixed gas to pour up to 40 kegs of beer per hour (20 kegs per blend mix).

The modular design allows the B2U Gas Blender to be readily attached to the side of the MILCARB Nitrogen 2U® Wall Mount Generator or directly to the wall. The versatility of wall mounting permits the B2U Gas Blender's use with the MILCARB Nitrogen 2U® Floor Mount Generator (without built-in blender) or another nitrogen gas supply.

Optional downstream leak detection equipment also available.
8.2"(L) x 11.5"(H) x 5.3"(D)
